

Trifunctional Biphenyl-Type Epoxy BPTE

- ◆ Multifunctional epoxy compound with a rigid biphenyl backbone
- ◆ Liquid, low-viscosity, highly soluble, and low residual chlorine
- ◆ Epoxy composite is expected to have high thermal conductivity, low coefficient of thermal expansion (low CTE), and high heat resistance.

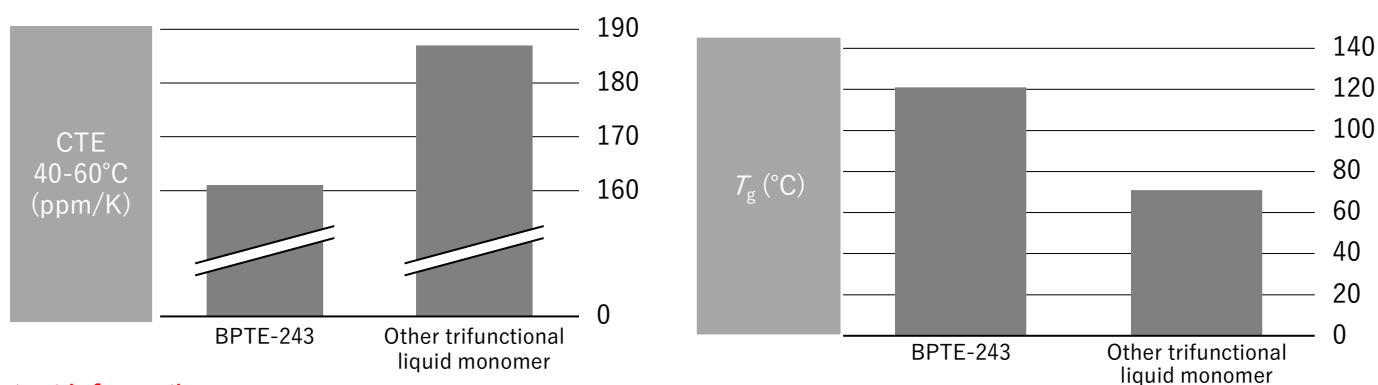

General Information

Chemical Name	2, 3', 4-tris(2, 3-epoxypropoxy)biphenyl
CAS	2377554-87-3
Molecular Weight	370.4
Physical Form	Pale yellow liquid

Cured Material Properties

Cured material properties when 50% added to bisphenol F epoxy compound
